

# BabySteps

## THERAPY

A PLACE TO GROW.

### SUMMER 2018

#### Multi-Sensory Social Skills

Multi-Sensory Social Skills Group is taught by both an Occupational Therapist and Speech-Language Pathologist. The sessions emphasize engaging the student in activities that teach them about themselves and how to navigate social environments.

Students will learn to recognize their strengths and weaknesses in order to make sense of their environment. Each session will have a multi-sensory component to facilitate learning. In working on social skills and perspective taking, students will begin to appreciate the differences in others and their own uniqueness. Students will practice common social interactions within the clinic setting, and complete homework assignments to interact socially in the community.
